1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 7-9, 11-13, 16-19, and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krenzin in view of Ander (USPN 5,278,761).

Krenzin shows an industrial truck with a driven and steered wheel 22 and two non-driven wheels 26. It also includes a traction control system whereby wheel slip is determined by comparison of a speed calculated for the driving wheel and a traveling speed determined for the industrial truck. The traveling speed is determined from the rotational speed of the non-driven wheels. The truck has an electric motor.

Krenzin lacks means for reducing drive torque in response to detected slip.

Ander describes a traction control system including a means for reducing torque to at least one drive wheel in response to determines slip, as is conventional in traction control systems. Slip is determined by comparing the speed of driven and non-driven wheels. It also factors a detected steering angle signal into the slip calculation.

It would have been obvious to one of ordinary skill in the art to reduce drive torque in response to determined slip, as is old and well known, as is taught by Ander, in order to reduce excessive drive slip. It would also have been obvious to use a three-phase ac motor, for the unspecified electric motor of Krenzin, in order to provide an appropriate drive source.

3. Claims 4-6, 10, 14, 15, 20-22, 25, and 26 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

4. Applicant's arguments with respect to claims 1-3, 7-9, 11-13, 16-19, 23 and 24 have been considered but are moot in view of the new ground(s) of rejection.
